PROFESSIONAL SUMMARY

Data Analyst with practical experience in Python, SQL, and Power BI — skilled at turning raw data into clear business insights. Built end-to-end dashboards, KPI reports, and segmentation analyses during a 6-month internship at Rubixe AI. Holds a DataMites certification and a Google Data Analytics certificate, with two published research papers and two completed capstone projects.

EXPERIENCE

Data Analyst Intern — Rubixe AI

Oct 2025 – Apr 2026

Bengaluru, Karnataka, India

- Analyzed large-scale datasets using Python (Pandas, NumPy) and MySQL to surface actionable business insights for client-facing projects.
- Built interactive Power BI dashboards and KPI reports; presented data visualizations and findings to stakeholders to drive data-driven decisions.
- Executed end-to-end ETL pipelines — data cleaning, transformation, and quality assurance — for downstream analysis and reporting.
- Collaborated in a cross-functional 4-person team to gather requirements, align on KPIs, and deliver business intelligence solutions on schedule.
- Applied statistical and predictive analysis to identify trends, patterns, and anomalies; communicated insights through structured reports and data storytelling.
- Used Generative AI tools and prompt engineering to automate recurring reporting tasks and accelerate the analysis workflow.

PROJECTS

Turkish Retail Customer Segmentation Dashboard

Feb 2026

DataMites Capstone Project | Tools: Power BI, MySQL, DAX, Excel

- Designed a two-page interactive Power BI dashboard (live MySQL via ODBC) for retail customer segmentation and business intelligence reporting.
- Implemented advanced DAX measures (TOPN, SUMX, FIRSTNONBLANK) to compute dynamic KPIs across gender, age, product category, and payment method.
- Conducted 10+ structured SQL queries in MySQL Workbench; resolved a critical unit price vs. transaction value data quality issue before final reporting.
- Delivered a stakeholder-ready dashboard with sync slicers and page navigation — designed for non-technical audiences.

McDonald's Nutritional Diagnostic Report

March 2026

DataMites Capstone Project | Tools: Power BI, MySQL, DAX, Excel

- Built a Power BI dashboard analyzing 57 McDonald's menu items across 8 fast-food chains (515 records) with DAX-driven Calorie Band segmentation.
- Found 74% of McDonald's items exceed the 1,000 mg sodium threshold (avg 1,438 mg = 62% of daily intake); led competitor benchmarking showing McDonald's leads in calories (640 kcal) and protein (40.3 g).

- Delivered a 9-slide diagnostic report with executive summary, sodium risk analysis, and healthy menu audit — translating data findings into business recommendations.

SKILLS

Languages: Python, SQL, MySQL

Libraries: Pandas, NumPy

Databases: MySQL, MongoDB (NoSQL)

Visualization: Microsoft Power BI (DAX, ODBC), Tableau, Data Visualization, Dashboard Design, KPI Reporting, Business Intelligence

Excel: Advanced Excel, Pivot Tables, VLOOKUP / XLOOKUP, Power Query

Tools: Jupyter Notebook, GitHub, Power BI Desktop, Orange (No-Code ML), Agile Methodology

Data Engineering: ETL Pipelines, Data Cleaning & Transformation, Data Quality Assurance, Statistical Analysis, Predictive Analysis

Communication: Stakeholder Communication, Data Storytelling, Reporting, Business Insights Presentation

AI & Productivity: Generative AI (ChatGPT, Copilot, Perplexity), Prompt Engineering for Analytics

CERTIFICATIONS

- Google Data Analytics Professional Certificate — *Coursera / Google*
- Microsoft Power BI Data Analyst — *Udemy Certified*
- Advanced Microsoft Excel — *Udemy Certified*
- DataMites Certified Data Analyst — *DataMites Institute*

EDUCATION

B.Tech – Mechanical Engineering

2020 – 2024

Anjuman College of Engineering and Technology, RTMNU Nagpur | CGPA: 7.39

Certified Data Analyst Program

2025 – 2026

DataMites Institute of Data Science & AI, Bengaluru
